## Summary

A self-motivated Front-end developer with 6+ years of professional experience and very eager to learn new things. I have worked for a company with video sharing platforms with over 60 million monthly users. I want to contribute to teams as a creative person who loves the challenge of figuring out how to find the best solution to improve or create efficient & performant **JS/React** web apps.

## Skills

- Programming languages: **JavaScript**, **ES6+**, **TypeScript**, HTML, CSS, SCSS
- Libraries / Frameworks: **React**, **Redux**, Next.js, React Query, CSS modules, MUI (Material UI), Storybook
- Tools / libraries / patterns: **React hooks**, **ReactContext**, HOC, Unit testing, **Jest**, React Testing Library, Webpack, Git
- Agile Methodologies: Jira, Scrum
- Communication: English (Professional working proficiency), Persian (native)

## Experience

### Front-end Developer

Sabaldea

06/2021 - 07/2023

*Sabaldea.com* is the owner of some of the most popular Iranian online services including Aparat, Filimo, Sabavision and CinemaTicket. Aparat have over 60 million monthly users.

- Developed new features using **JavaScript**, **React**, **Redux**, and **Styled-components** in collaboration with designers and product managers
- Refactor Authentication **React app** for Aparat and Flimo. upgrade from Class Component to Functional Component and Hooks
- Created and maintained a new Aparat IncomeDashboard page **with over 70% test coverage**
- Created static pages such as the job and contact page as pixel perfect based on Figma
- Participated in peer code reviews and agile team meetings; Guided new joiners to get to know the projects

### Front-end Developer

Neshani Hichestan

Tehran, Iran

11/2018 - 04/2021

*Hichestan* was a real estate platform aiming to create a pleasant journey for users who are looking to rent their house.

- Developed a SPA using the latest technologies, which **resulted in a 1.5% market share** after 1.5 years, using **React**, **Typescript**, **Redux**, **HTML/CSS**, and **React Query**
- Optimized SEO by 10% with a custom pre-renderer using Puppeteer similar to Rendertron (for bots and crawlers)
- **Reduced bundle size by 30%** by separating mobile and desktop bundles in Webpack config which lead to **decreasing page load time around 2 seconds**
- Continuously analyzed & worked on improving existing code, removing unnecessary libraries, removing extra re-renders, and efficient code splitting, aiming to keep a lighthouse score above 70
- Added React Query to the project for **improving the user experience** by memoizing query results, having optimistic changes in UI, and preventing multiple requests for the same data
- Contributed to multiple projects across 3 teams

### Front-end Developer

BaninaB Pardazesh

Tehran, Iran

06/2017 - 11/2018

*Baninab* was an M2M & IoT solution provider with two main products: reactive data center monitoring service with customizable widgets and panels (DCMON) and smart alerting system(Baniguard)

- Took part in coding a platform to generate custom widgets and customizable dashboard pages for monitoring IoT and M2M based projects and data centers using Angular 4 for Middle East Bank
- Design and Developed BaninaB website. **React** for main website and Wordpress for Blog
